

**Project**

This project was completed with a Masters student at University of Arts London (UAL) - Central St Martins campus as part of their research around learning spaces. They are completing an MA in Architecture.

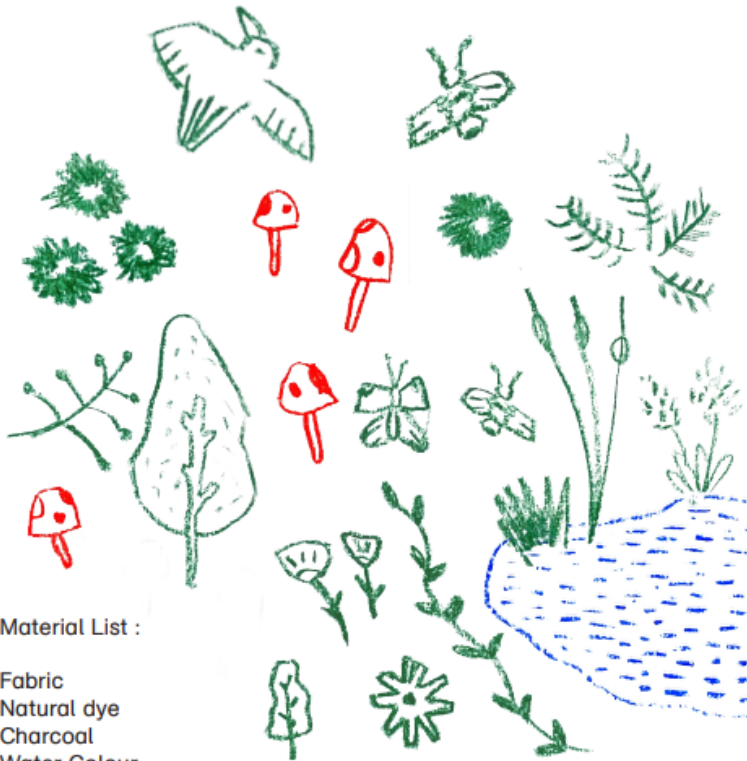

The project involves two workshops and follow up with Pupils and Teachers. Collaborating exchanging and skills through reimagining, planning and delivery outside of the traditional classroom space– which, beyond tools and technology has changed very little over time.

# NATURE

# CONNECTING WITH

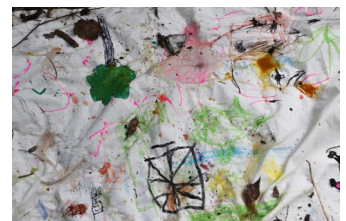

Join me for a collaborative drawing workshop where we all select organisms (animals, plants) in nature, see through their perspectives and understand our relationships with them.

Date: 16 May 2023  
Location: Robert Blair School Garden

**Material List :**

- Fabric
- Natural dye
- Charcoal
- Water Colour
- Pencil / Markers

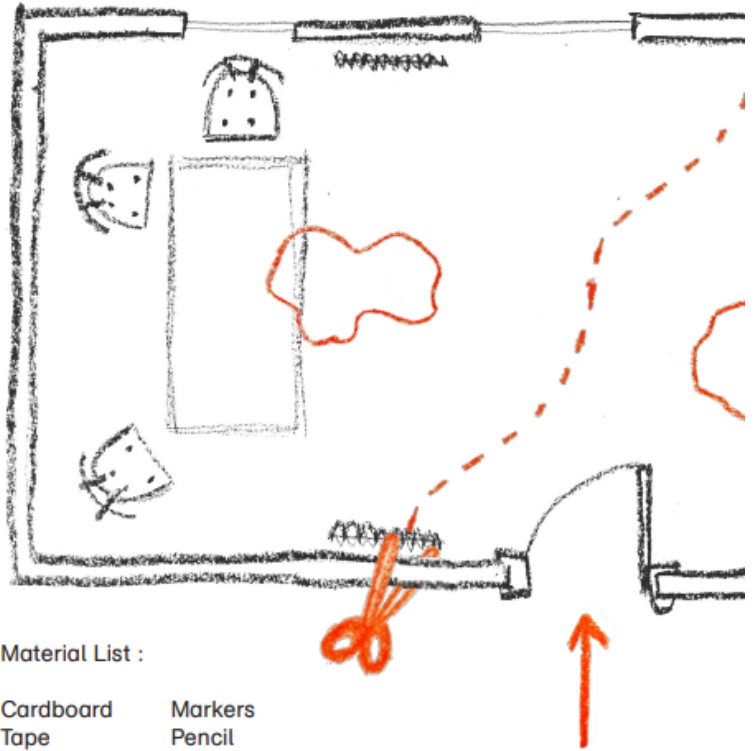

# SPACE

# REIMAGINING YOUR

Join me for a collaborative drawing and building workshop. Together we will explore a room in your school and reimagine how it might work for different uses.

Date: 18 May 2023

Location: Robert Blair School Classroom

## Material List :

- |            |               |
|------------|---------------|
| Cardboard  | Markers       |
| Tape       | Pencil        |
| Cable ties | Acrylic Paint |
| Paper      | Brushes       |
| Scissors   |               |

**Irmak Kuzu** ■ I am a Master in Architecture student at Central Saint Martins. I am currently working on a project exploring the culture of children's involvement in the production of the built environment. Through this process, I hope to collaborate with local schools in Kings Cross.
